1.3 Brand

Vision

To be the leading technology integration partner, globally recognized for our expertise in creating seamless (inline), reliable, and innovative system connections, empowering businesses to achieve unlimited efficiency and growth.

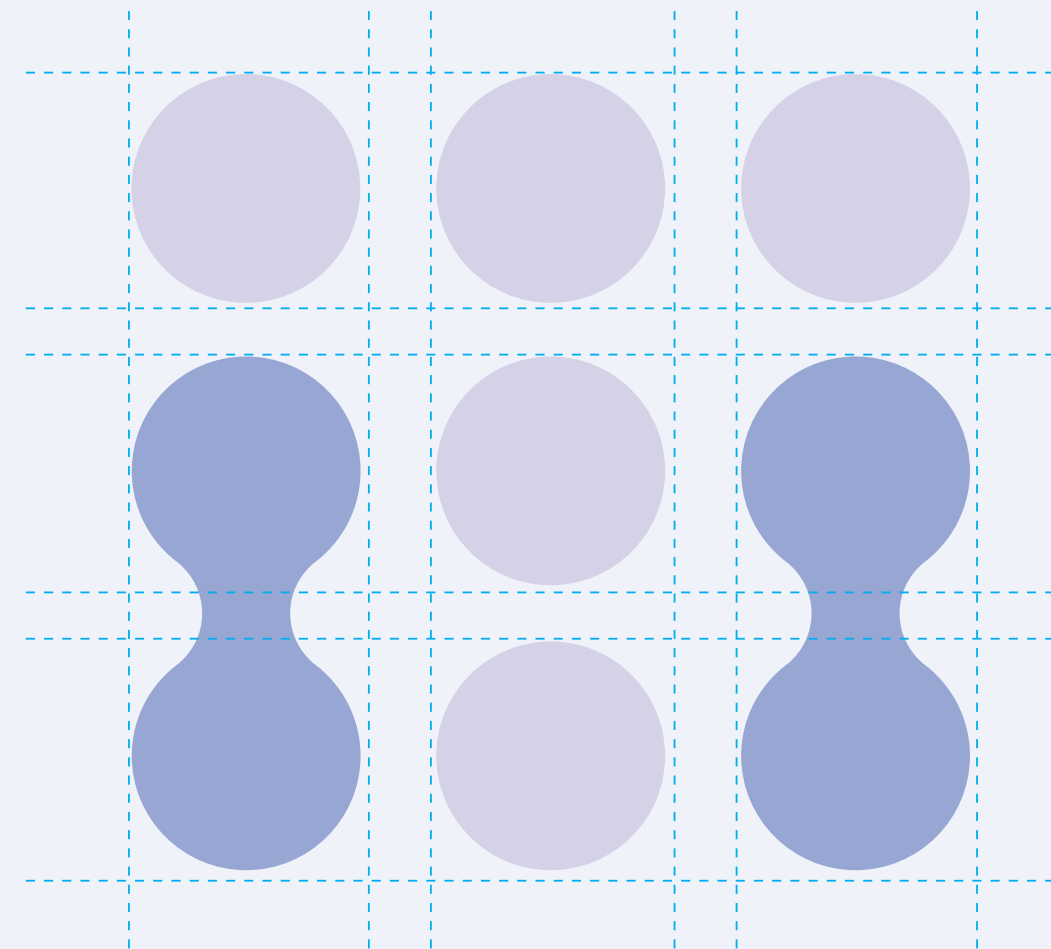

Objective

To build a reputation as the most stable and trustworthy technology provider.

1.4 Logo Philosophy

The eight arranged dots (circles) symbolize nodes, data points, or system components. This strongly suggests the concept of networking, integrated systems, and interconnection—highly relevant for a technology company.

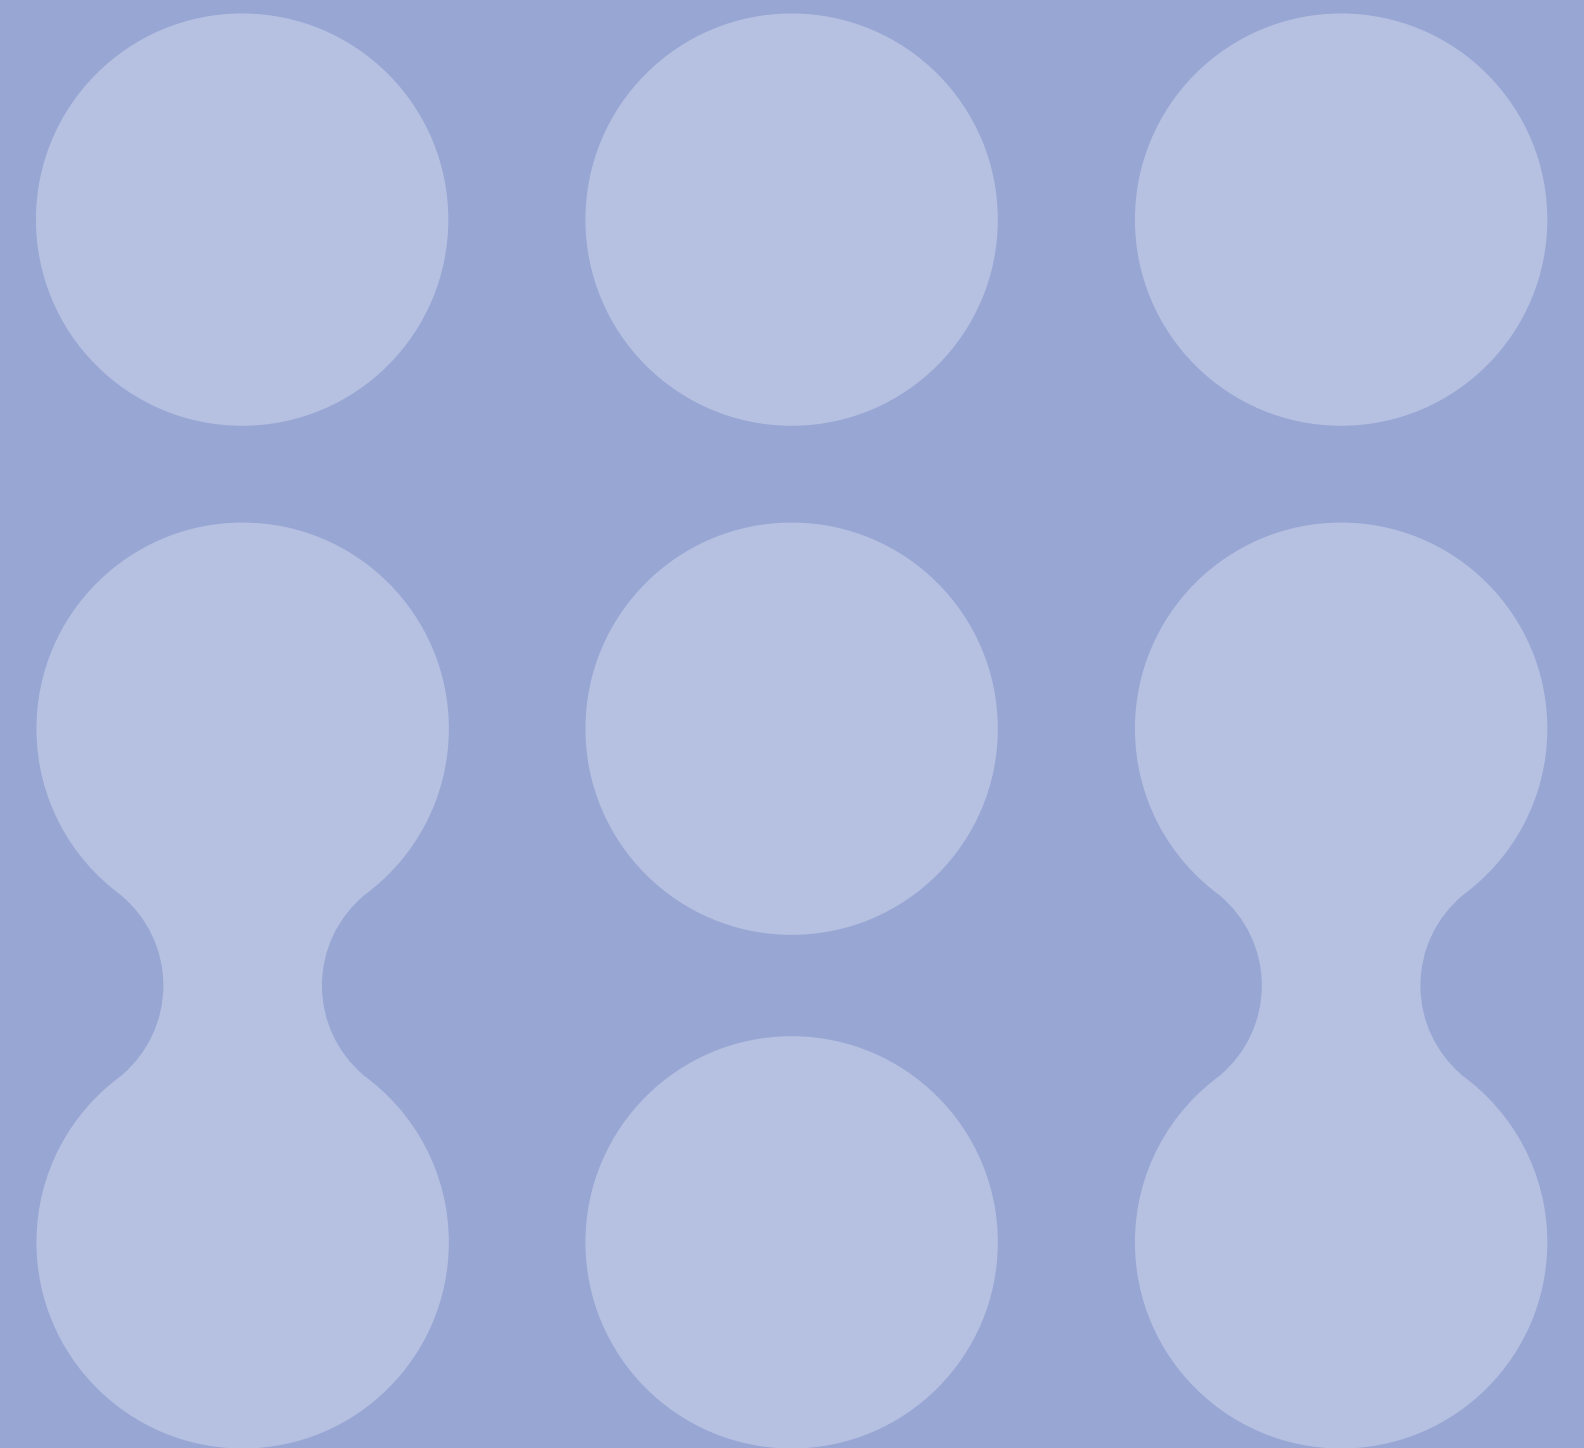

Each dot represents a separate yet collaborating component. This can symbolize the company's modular solutions or a flexible team working synergistically. The vertical and horizontal arrangement can also hint at data flow or information processes.

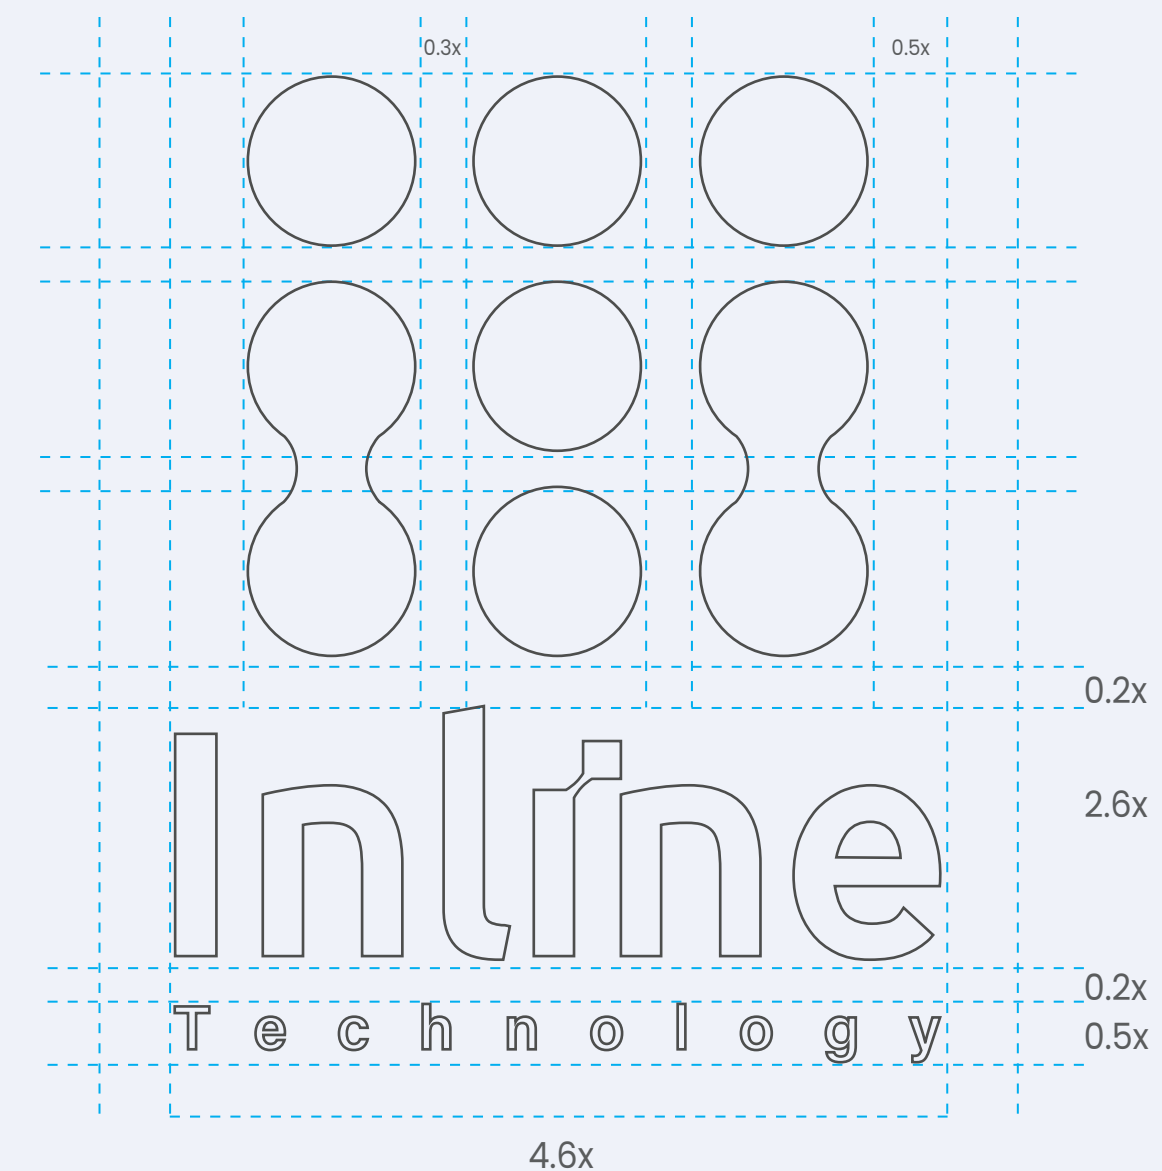

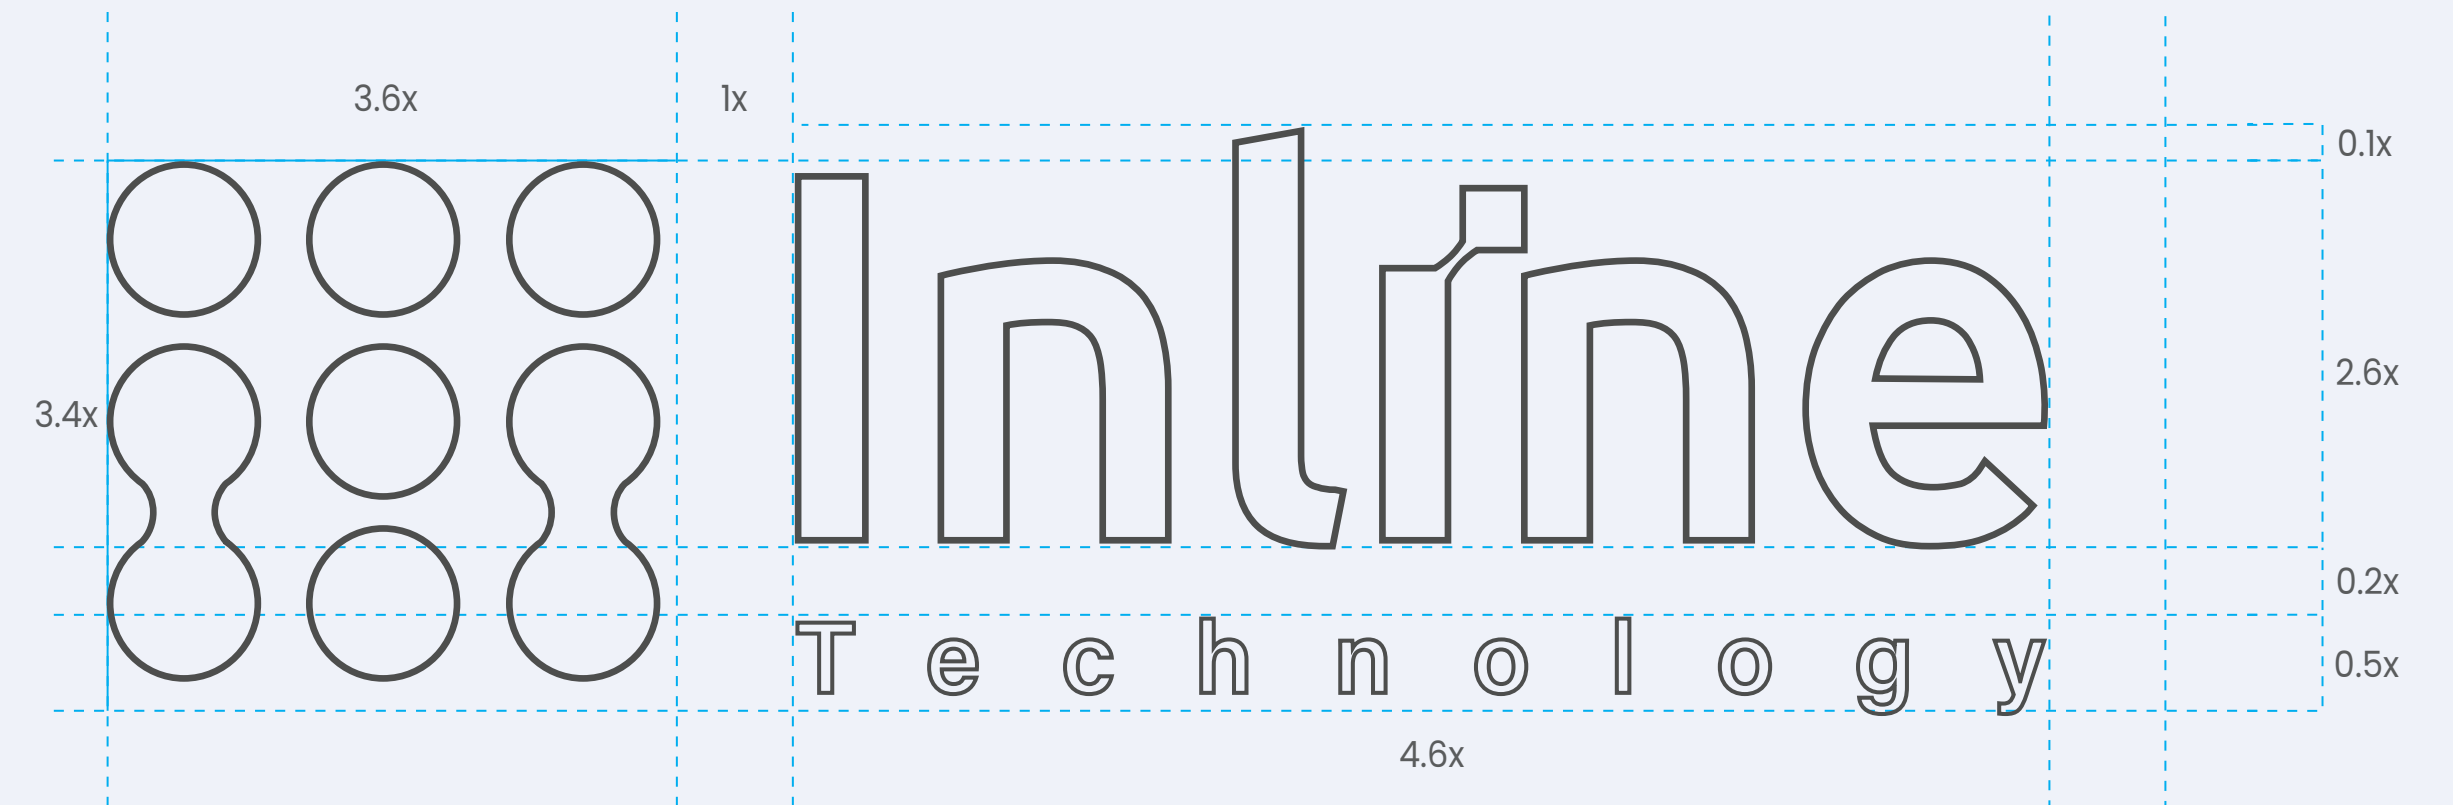

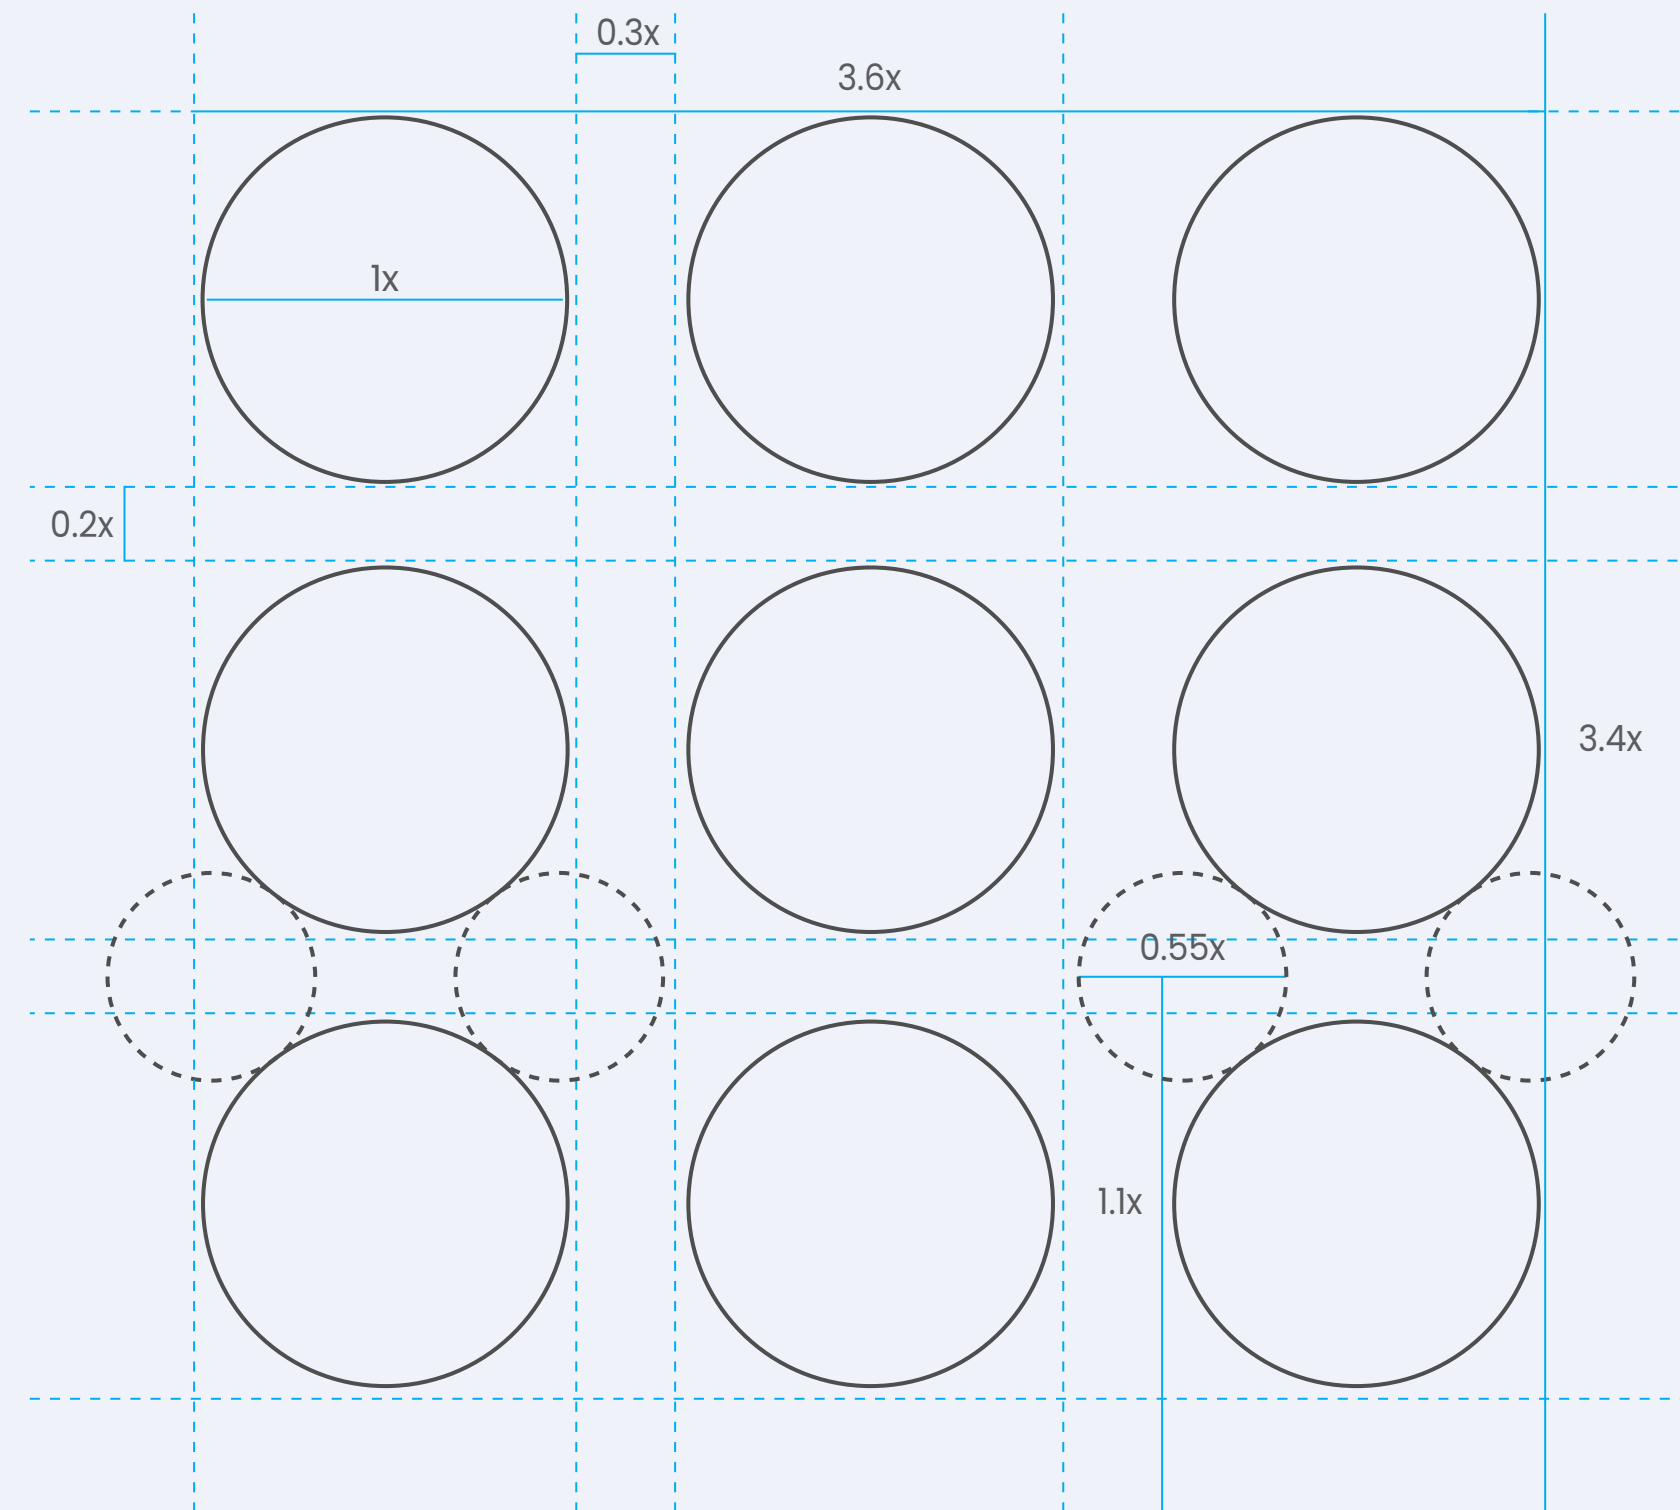

The use of a bold and modern sans-serif font conveys an impression of strength, modernity, and rapid readability. The flow of the second 'I' has a slightly rounded cut or shape at the top. This gives a sense of personalization, design innovation, and attention to detail—implying that they do not just use standard solutions. The word 'Inline' itself means 'in line,' 'side-by-side,' or 'integrated.' This reinforces the philosophy of efficiency, system integration, and uninterrupted processes.

The overall philosophy of the logo is Reliable and Innovative Integration. The company positions itself as a solution provider that prioritizes smooth connectivity, modular systems, and trustworthy service.

2.0 Logo

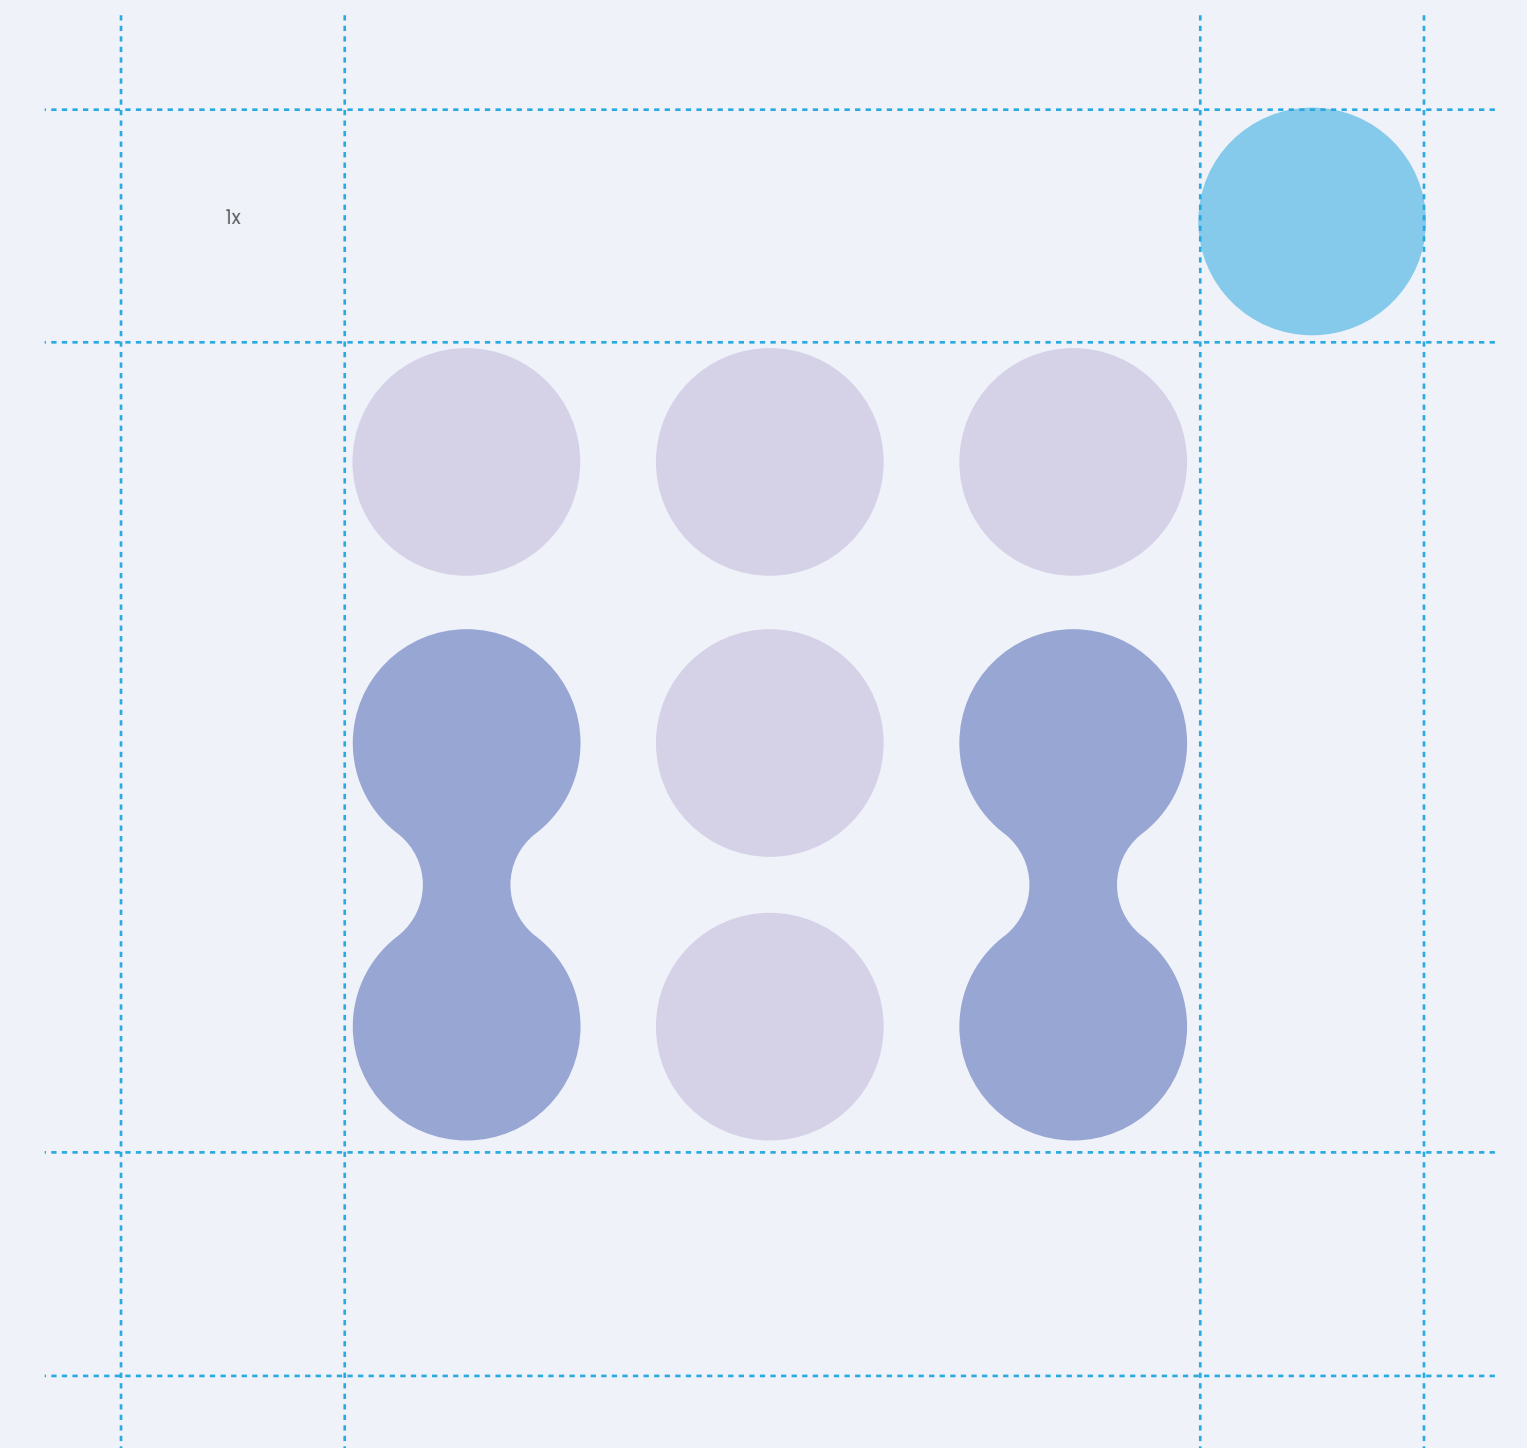

2.1 Logo Construction

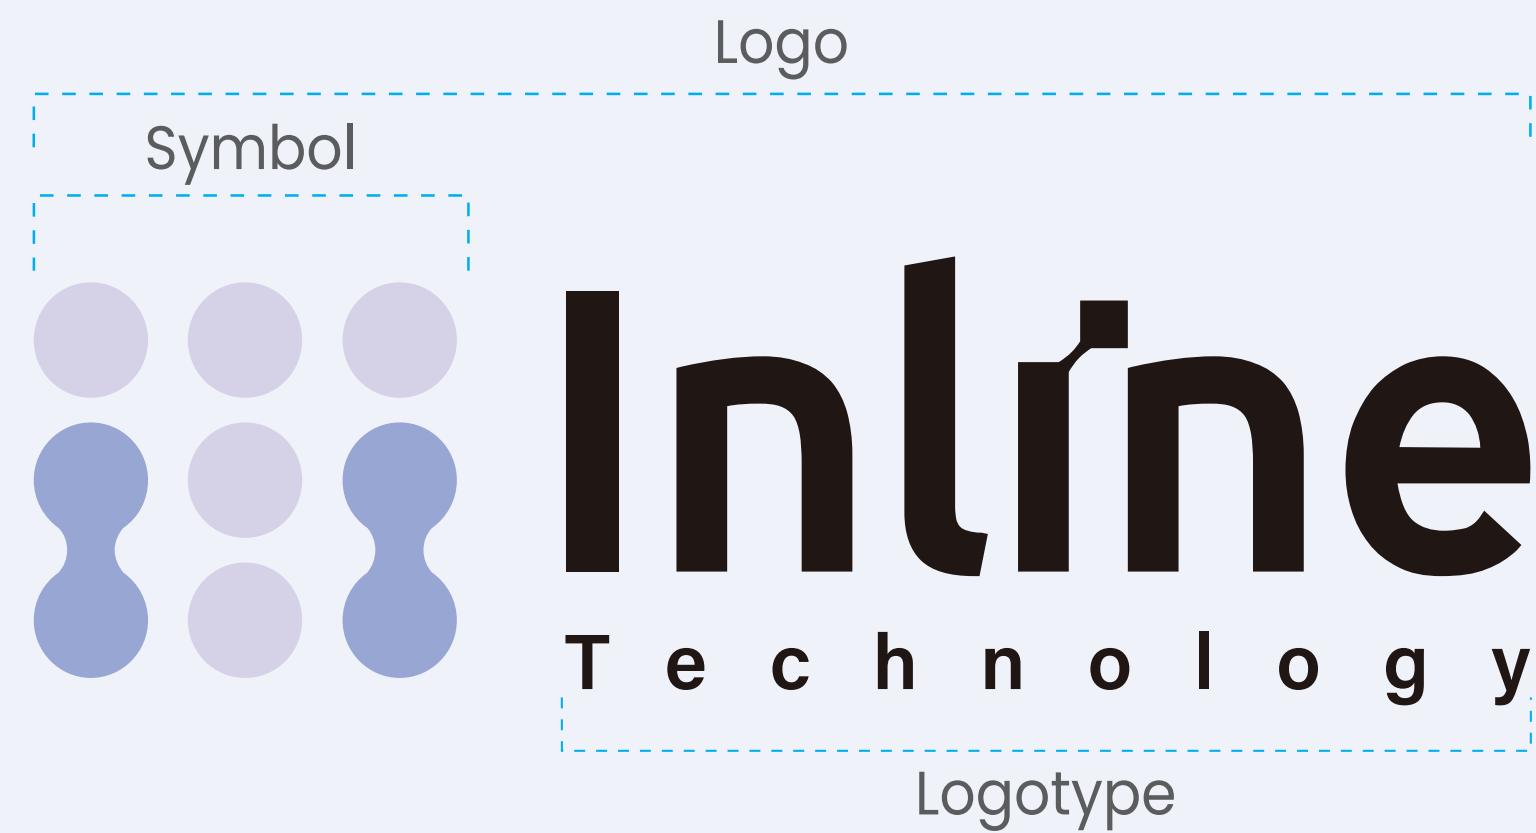

2.2 Minimum Clear Space

Clear space prevents type, imagery or other graphic elements from interfering with the legibility of our logo. No graphic elements should encroach the border around the logomark. This space is determined by **one circle component** of logomark on each side.

2.3 Logo Usage

Our logo is the face of our brand – the identity ourselves. Meaning that we need to be careful to use it correctly and to do so consistently.

2.4 Logo Variation

Full color
